TRIPLE VENTURI BAFFLE FILTER

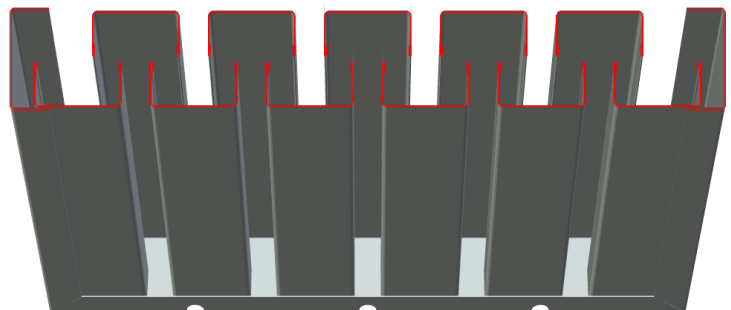

January, 2020

Creating the highest quality kitchen ventilation equipment requires in-depth knowledge of a chef's needs, restaurant servicing, expertise in ventilation engineering, HVAC install and modern manufacturing. The TVB filter has been specifically engineered to meet the highest standard possible. The TVB filter is suitable for the most demanding cooking situation. It is optimised for high heat and high durability.

Details

- **Energy efficiency** is very important for kitchen ventilation because of the volumes of air involved.. The TVB filter achieves the highest levels of energy efficiency with tightly calibrated internal dimensioning. The filter includes three internal constrictions oriented in a proprietary way in order to maximise fume capture and minimise drag.
- **Ease of operation** is often overlooked but is very important for the successful hospitality business.
- **Durable** Heavy-duty stainless steel filters fit and can be **easily cleaned** in common commercial dishwashers.
- **Certified and fire tested filters.** CE, Flame impingement to DIN 18869-5.
- **Air quality tested, 98% removal efficiency** using gravimetric determination to DIN 18869-5
- **Quiet** operation of a hood helps and reduces stress in the kitchen

EU TVB 370 Baffle Filter

Model Number: N15i15

Dimensions	mm	Inch		
Length	370	14.57		
Width	45	1.77		
Height	500	19.69		
Airflow	L/s	CFM	Clean Resistance, Pa	Dirty Resistance, Pa
Optimum	178	378	82	91
Maximum	330	699	325	346

Options Available

- Add handle

Weight

2.5Kg, 5.5lb
